February 1952; the passage of a train with AA troops through Frankfurt/Oder toward Beeskow on the same day; and the observation in Justerlog of a train without engine that carried an AAA component of an unidentified AAA division of the Fourth Gds Mecz Army on 1 March 1952. [redacted] 50X1-HUM

- (2) The trucks belong to the 9th Gds Tank Div, including the 33d Gds Itz Rifle Regt from Pasewalk, and to the unidentified rocket launcher regiment of the Second Gds Mecz Army in Schoenwalde. The two rocket launchers probably also belonged to the latter regiment. The component of the 9th Gds Tank Div was probably identical with the one which went from Pasewalk to Justerlog via Neustrelitz on 25 and 26 February on the train [redacted] 50X1-HUM
- [redacted] which was returning to its post on 29 February 1952. [redacted] The rocket launchers were probably unloaded at the Veltin railroad station. [redacted]
- [redacted] 10 of the 22 artillery pieces mentioned in the present report were 152-mm field howitzers of model 1943, while the other guns may have been heavy and medium AT guns.
- (3) The assignment of the artillery pieces cannot be definitely established. The unit concerned is believed to have been a component of the 693d How Artv Regt of the 207th Itz Rifle Div from Stendal [redacted] 50X1-HUM
- (4) [redacted] the trucks belong to the 9th Mecz Div from Cottbus.
- (5) Reports from Weimar also contained vague indications that advance parties of the troop units stationed there may have left the post during the first days of March 1952. [redacted] 50X1-HUM
